

YOUNG SPEAKER

Dr. Luca Rocchigiani

University of Perugia, Italy

Luca Rocchigiani was awarded his Master (2007) and Ph.D. (2011) degrees in Chemistry by the University of Perugia (Italy) under the supervision of Prof. Alceo Macchioni. After a post-doctoral position in partnership with the Dutch Polymer Institute of Eindhoven, in 2015 he moved to the University of East Anglia in Norwich (UK) to work as a Senior Research Associate in the group of Prof. Manfred Bochmann. In 2019 he has been appointed as Lecturer in Inorganic Chemistry at the School of Chemistry of UEA, where he started his independent career. In 2021 he returned to the University of Perugia, where he has been appointed as

Assistant Professor in Inorganic Chemistry in the Department of Chemistry, Biology and Biotechnology.

His research interests are focused on the investigation of bonding and reactivity of organometallic compounds relevant in homogeneous catalytic transformations and small molecule activation reactions, spanning from early to late transition metals and main elements. He is also interested in the application of NMR spectroscopy to the study of supramolecular properties of organometallic aggregates and ion pairing effects.
